

### Assignment -1

Assignment Date	26 September 22
Student Name	SARAVANASUDHAN.S
Student Roll Number	621319106082
Maximum Marks	2 Marks

#### Question-1:

Build a python code, Assume you get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

#### Solution:

```
# import the random and time librarys
import random
import time

# iterate the random values of Temperature and humidity within the specified range
while True:
    temp = random.randint(35, 209)
    humi = random.randint(0, 100)

    #print the values of Temperature and humidity
    print("Temperature is : "+str(temp)+"F")
    print("Temperature in celsius : "+str(((temp-32)*5)//9)+"?")
    print("The Humidity is : "+str(humi)+"%")

    # check if the temperature values are higher than 100F
    if (temp >= 100):
        print("High Temperature Alert : "+str(temp)+"F")
        time.sleep(10)
```

The screenshot displays the OnlineGDB web interface. The browser's address bar shows 'onlinegdb.com'. The interface includes a sidebar on the left with navigation links: 'Create New Project', 'My Projects', 'Classroom' (marked as new), 'Learn Programming', 'Programming Questions', 'Logout', and social media links for Facebook, Twitter, and a '+ 175K' button. The main area is divided into two sections: a code editor and an output window. The code editor shows a Python script named 'main.py' with the following content:

```
1 # import the random and time Librarys
2 import random
3 import time
4
5 # iterate the random values of Temperature and humidity within the specified range
6 while True:
```

The output window, titled 'input', shows the execution results of the script:

```
Temperature is : 109°F
Temperature in celsius : 42°C
The Humidity is : 89%
High Temperature Alert : 109°F
Temperature is : 128°F
Temperature in celsius : 53°C
The Humidity is : 2%
High Temperature Alert : 128°F
Temperature is : 190°F
Temperature in celsius : 87°C
The Humidity is : 27%
High Temperature Alert : 190°F
Temperature is : 169°F
Temperature in celsius : 76°C
The Humidity is : 98%
High Temperature Alert : 169°F
```

The bottom of the interface features a footer with links: 'About', 'FAQ', 'Blog', 'Terms of Use', 'Contact Us', 'GDB Tutorial', 'Credits', 'Privacy', and '© 2016 - 2022 GDB Online'. The Windows taskbar at the very bottom shows the system clock as 22:31 on 25-09-2022.
